Single Drum Vibratory Roller

XS265S vibratory roller is a kind of heavy type self-propelled vibratory roller, mainly applicable for compaction work of base layer, sub-base layer of different materials and filling projects. It is an ideal choice for compacting high grade highway, airports, ports, dams and industrial construction sites.

Performance and characteristics

- Cylinder-type four-support long-life drum, unparalleled 10,000 hours lifetime expected under standard working conditions.
- Centered static and dynamic forces for state-of-the-art compaction homogeneity — less than 5%.
- Exclusive drum surface hardening technology, drum stiffness improved by 100%.
- Increased compaction capacity. Large tonnage, high excitation force, suitable for different compaction conditions, high compaction efficiency.
- High compaction quality Centered static and dynamic forces for best compaction homogeneity — less than 5%.
- Comfort control With large combination dashboard display, all kinds of operating parameters at a glance, levers, switches, keys are in the operating comfort zone.
- Heating and cooling air conditioner offers high operating comfort.
